Contents

Chapter 1

General Introduction – 9

Part I Cardiac Remodeling and Chronic Heart Failure – 11

Part II Thyroid Hormone and the Heart – 18

Part III A Evidence for a local hypothyroid condition – 24

Part III B Focus on DIO3 – 27

Aims and outline of the study – 29

Chapter 2

Thyroid hormone-regulated cardiac microRNAs are predicted to suppress pathological hypertrophic signaling – 31

Abstract – 32

Introduction – 33

Materials and methods – 35

Results – 37

Discussion – 42

Supplementary data – 45

Chapter 3

Cardiac expression of deiodinase type 3 (Dio3) following myocardial infarction is associated with the induction of a pluripotency microRNA signature from the Dlk1-Dio3 genomic region – 49

Abstract – 50

Introduction – 51

Methods and methods – 52

Results – 54

Discussion – 57

Supplementary data – 59

Chapter 4

MicroRNA 214 is a potential regulator of thyroid hormone levels in the mouse heart following myocardial infarction, by targeting the thyroid-hormone inactivating enzyme deiodinase type III – 63

Abstract – 64

Introduction – 65

Materials and methods – 67

Results – 71

Discussion – 77

Supplementary data – 80

Chapter 5

Cardiac induction of the thyroid-hormone degrading enzyme type III deiodinase in human ischemic heart failure – 83

Abstract – 84

Introduction – 85

Methods and materials – 87

Results – 90

Discussion – 93

Chapter 6

Summary and general discussion – 97

References – 110

List of abbreviations – 124

Authors affiliations – 126

Nederlandse samenvatting – 127

Curriculum Vitae – 131

List of publications – 133

Dankwoord – 134
